

Walking or cycling to work

We have a range of tools and infrastructure to make it easier for you to walk or cycle across London as you return to the workplace

Our cycling network

Our [Cycleways](#) link communities, businesses and destinations across the city in an ever-growing network. With 362km of cycle routes, our cycle map can help you identify Cycleways and find docking stations.

Learning to cycle

Whether you're new to cycling or just want to brush up on your skills, our free online [Cycle Skills course](#) can help you get started. You can also book face-to-face [cycle training](#) in your local borough.

Santander Cycles business accounts

Businesses can give their employees access to our expanding network of 11,500 Santander Cycles, which are available at more than 750 locations, through a [Santander Cycles business account](#). These provide an easy, convenient and environmentally-friendly way to get around central London. There will also be 500 new Santander Cycles e-bikes available from summer 2022.

Space to walk and cycle

Since the start of the pandemic, we have created more than 100km of cycle routes, as well as 22,500 square metres of pavement for people to walk on. We have also installed 1,540 extra cycle parking spaces across London.

London's rental e-scooters

We are running a trial of [e-scooters](#), which are now available to park and ride in a range of boroughs, providing a greener alternative to cars. Safety is at the heart of the trial, with technology such as geo-fencing and automatic speed-limiting built into each vehicle. The rental e-scooters can be used on roads and Cycleways.

Tools to help plan your journey

[TfL Go app](#) shows you walking and cycling options

[Journey Planner](#) provides walking and cycling options for your journey

[Cycle map](#) is a detailed map of our Cycleways

[Santander Cycles app](#) helps you find a docking station and hire a Santander Cycles bike

[Go Jauntly app](#) helps you to plan your walking route

[Walking Tube map](#) shows you how long it takes to walk between stations

[Central London Footways](#) map from Living Streets shows a network of streets that are ideal for walking
